Textiles

Product 860727 T-Shirt Back to normal S

Safety Data Sheet for Textiles

Usage: Textiles are used in the clothing and home textile industries to produce various types of clothing, bedding, curtains and other textile products.

Materials: Textiles are typically made of cotton, polyester, wool, silk, nylon, acrylic, and other natural or synthetic fibers.

Risks:
Flammability: Some textiles may be highly flammable and pose a fire hazard.

Allergic Reactions: Some materials or chemicals used may cause allergic reactions.

Fiber release: Fibers from textiles can be inhaled and cause respiratory irritation.

Security measures:
Handling: Use appropriate protective clothing and equipment to minimize contact with potentially irritating or allergenic materials.

Storage: Store textiles in well-ventilated areas, away from open flames and heat sources.

Use: Follow the manufacturer's care instructions and washing instructions to ensure the safety and longevity of the textiles.

Disposal: Dispose of worn or damaged textiles properly to avoid environmental damage.

Storage Notes: Store textiles in a dry, cool place, away from direct sunlight and moisture, to prevent mold growth and material deterioration.

First aid measures:
Inhalation of fibers: Get fresh air and seek medical attention if respiratory irritation occurs.

Skin contact with allergenic materials: Wash the affected area thoroughly with soap and water. If symptoms are severe, see a doctor.

Burns caused by flammable textiles: Extinguish the flame and cool the affected area with cold water. Seek medical help immediately.
