

Batteries and chargers for batteries

Product 664233 Ansmann Lithium-Knopfzelle CR2032 3V (1)

Safety Data Sheet for Batteries and Chargers

Usage: Batteries are used to power various electronic devices. Chargers are used to recharge rechargeable batteries.

Materials:

Batteries: Chemical compositions such as lithium ions, nickel metal hydride (NiMH), lead acid, alkaline manganese

Chargers: Electronic components, plastic housings, metal contacts

Risks:

Electrical hazard: Risk of electric shock from electrical components

Chemical Hazard: Leaking or leaking batteries can cause skin irritation, eye injury, or poisoning

Fire Hazard: Improper handling or short circuit may result in fire or explosion

Risk of injury: Sharp edges or broken parts can lead to cuts

Security measures:

Handling: Use batteries and chargers only according to the manufacturer's instructions

Storage: Store batteries in a cool, dry place, away from direct sunlight and extreme temperatures

Usage: Avoid short circuits, overcharging or deep discharging of the batteries

Disposal: Dispose of batteries and chargers in accordance with local hazardous waste regulations

Protective Equipment: wear gloves and safety glasses if necessary to avoid injury

First aid measures:

Skin contact: If you come into contact with leaking battery contents, clean the affected area thoroughly with soap and water

Eye contact: In case of eye contact, rinse eyes under running water for at least 10 minutes and seek medical attention

Inhalation: If you inhale fumes, move to fresh air and seek medical attention if you have difficulty breathing

Ingestion: If batteries or their contents are swallowed, seek medical attention immediately
