

Keychains

Product 664808 GA Gretsch Metal Keyring

Safety Data Sheet for keychains

Usage: Keychains are used to organize and carry keys. They can also contain decorative or functional pendants.

Materials: Keychains are typically made of metal, plastic, leather, fabric, or a combination of these materials.

Risks:

Risk of injury: Sharp edges or protruding parts can lead to cuts.

Choking hazard: Small parts of the key ring can be swallowed, which can be particularly dangerous for children.

Allergic Reactions: Some materials may cause allergic reactions.

Security measures:

Handling: Handle the key fob with care and check it regularly for wear and damage.

Use: Use the keychain only for its intended purpose and keep it out of the reach of children.

Disposal: Properly dispose of damaged or worn key fobs.

Allergic Reactions: Avoid contact with materials to which you have allergic reactions.

Storage Notes: Store the keychain in a dry, safe place, away from direct sunlight and extreme temperatures.

First aid measures:

Injuries caused by sharp edges: Clean the wound thoroughly and apply a sterile compress.

Choking Hazard: Seek medical attention immediately if any part of the key fob is swallowed.

Allergic reactions: Rinse the affected area thoroughly with water and seek medical attention if symptoms are severe.
